Preface to the fourth edition xi
Acknowledgements xiii

Introduction 1

PART I Preparing the ground 5

1 Approaches to research 7

Action research and the role of practitioner researchers 8
Case study 10
Survey 13
The experimental style 14
Ethnography and the ethnographic style of research 16
The grounded theory approach 18
Narrative inquiry and stories 21
Which approach? 24
Further reading 24

2 Planning the project 28

Selecting a topic 28
Getting started 29
Hypotheses, objectives and researchable questions 32
Working title and the project outline 34
Timing 35
Supervision 36
Student–supervisor relationships 36
Codes of practice for supervision 38
Change of supervisor 38
Keeping records of supervisory tutorials 39
The research experience 39
Planning the project checklist 40
Further reading 42

3 Ethics and integrity in research 43

Research contracts, codes of practice, protocols and the principle of informed consent 44
Ethics committees 46
Confidentiality and anonymity 48
Ethical research in practice and the problems of 'inside' research 50
Codes of ethical practice relating to intellectual ownership/property 55
The ethics and integrity in research checklist 57
Further reading 58

4 Reading, referencing and the management of information 61

Reading 61
Note-taking and guarding against plagiarism 62
Referencing 65
Creating, editing and storing references electronically 68
The management of information 72

A lot of fuss about nothing? 74
Reading, referencing and the management of information checklist 75
Further reading 77

5 Literature searching 79

The library search 79
Computer literature searching 82
Devising a search strategy 85
The critical examination of evidence 89
To conclude 90
Top ten guide to searching the Internet 90
Electronic sources of information 92
Databases, books, journal articles (and a few other resources) 94
Libraries 95
Citations and references 96
Health and ethics 97

6 The review of the literature 99

The 'critical review' of the literature 100
Theory and theoretical (or conceptual) frameworks 101
The 'critical review' in practice 103
Reviewing the reviews 109
Remember! 110
The review of the literature checklist 110
Further reading 112

PART II Selecting methods of data collection 113

Introduction 115
Constraints 116
Reliability and validity 117
Thinking about computer data analysis? 118

Not thinking about computer data analysis? 119
A reminder 120
Further reading 120

7 The analysis of documentary evidence 122

Brendan Duffy

Approaches to documents 123
The location of documents 123
The nature of documentary evidence 125
The selection of documents 128
Content analysis 128
The critical analysis of documents 129
Fact or bias? 132
The analysis of documentary evidence checklist 133

8 Designing and administering questionnaires 136

Exactly what do you need to find out? 137
Question type 137
Question wording 138
Appearance and layout 144
Drawing a sample 145
Piloting the questionnaire 147
Distribution and return of questionnaires 148
Non-response 149
Analysis of data 150
Designing and administering questionnaires checklist 150
Further reading 153

9 Planning and conducting interviews 156

The ethics of conducting interviews 156
Advantages and disadvantages of the interview 157
Question wording 158

The interview schedule 159
Group interviews and focus groups 162
Tape-recording interviews 164
Bias – the old enemy 166
Remember! 167
Planning and conducting interviews checklist 169
Further reading 171

10 Diaries Logs and Critical Incidents 173

The diary-interview method 174
Variations in diary use and design 175
Personal research diaries 180
The ethics of diary use 181
Diaries, logs and critical incidents checklist 181
Further reading 183

11 Observation Studies 184

Unstructured observation 185
Participant observation 186
Structured observation and keeping records 188
Recording behaviour 189
Content 191
A few words of warning – again 194
After the event 195
Observational studies checklist 195
Further reading 197

PART III Interpreting the evidence and reporting the findings 199

Introduction 201

12 Interpreting the evidence and reporting the findings 203

List questions 204
Quantity and category questions 207
Grids 217
Scales 218
Verbal questions 225
Conclusions 226
Interpreting the evidence and reporting the findings checklist 227
Further reading 228

13 Writing the report 231

Getting started 231
Structuring the report 234
The need for revision 241
Any possibility of plagiarism? 243
Evaluating your own research 244
Writing the report checklist 245
Further reading 247

Postscript 249
References 251
Index 261
